

# The ASEAN Sustainable Urbanisation Strategy (ASUS)

 Around half of all ASEAN people live in urban areas, and an additional 70 million are forecast to live in ASEAN cities by 2025.

 ASUS provides the framework to address urbanisation challenges and improve the living standards of our people.

It is one of ASEAN's initiatives under the Master Plan on ASEAN Connectivity (MPAC) 2025 to improve the way we live, work, and travel.

 ASUS provides two toolkits for ASEAN cities to prioritise action and design high quality action plan. These toolkits can be customised to cities' local context.

## TOOLKIT 1

### Prioritising actions

-  Digital payment
-  Housing solution
-  Digital solution
-  Waste management system
-  Bus Rapid Transit (BRT) system
-  Traffic management system
-  Flood management system
-  Industry boot camps

### Illustrative priority action

Prioritised action	Importance	Relevance	Synergy with DPs*	Feasibility
 Bus Rapid Transit (BRT) System	medium	high	high	low

\*Dialogue Partners

## TOOLKIT 2

To develop robust strategies and project proposals, this toolkit provides actions templates with the structure below:

-  Action
-  Priority sub-area
-  Background & rationale
-  Common barriers to successful implementation
-  Objective & key outputs of the action
-  Key activities
-  Monitoring and review mechanism
-  Management of risks and lesson learnt
-  ASEAN partners active in this area

## ASUS could:

-  Help cities' decision-making by focusing on priority actions
-  Create a high-quality plan or improve existing plan
-  Design sound cities solution and attract funding from potential partners

Full version of ASUS and the toolkits can be downloaded at [www.connectivity.asean.org](http://www.connectivity.asean.org)
