

Connecting ASEAN through Development of Sustainable Infrastructure

ASEAN INITIAL PIPELINE OF INFRASTRUCTURE PROJECTS

ASEAN is developing the Initial Rolling Priority Pipeline of Potential ASEAN Infrastructure Projects to accelerate investment in infrastructure projects shortlisted by the World Bank, which will support the movement of people, services, goods and innovation across the region of more than 630 million people.

The Pipeline project is a part of ASEAN's initiative to achieve the goal of sustainable infrastructure set out in the **Master Plan on ASEAN Connectivity (MPAC) 2025**

This Project will:

- Improve the way people live, work, and travel
- Strengthen regional identity and further integrate the ASEAN Community
- Complement existing regional and sub-regional infrastructure and connectivity initiatives

19 PROJECTS ACROSS ASEAN

3 SECTORS:
TRANSPORTATION, ENERGY, ICT

INVESTMENT VALUE OF
MORE THAN USD 15 BILLION

Project Screening Criteria

- Contribution to Regional Connectivity
- Potential Economic, and Social Benefits
- Impact on Environment
- Financial Viability
- Implementation Capacity

Regional Connectivity

- Widening roads connecting each country
