

Framework for Improving ASEAN Infrastructure Productivity

Improved infrastructure productivity would allow economic progress to be maximised and scarce resources and funding to be allocated more efficiently.

The Framework for Improving ASEAN Infrastructure Productivity is designed to help ASEAN Member States improve their future infrastructure planning, delivery, and operation.

This is a Master Plan on ASEAN Connectivity (MPAC) 2025 Initiative to improve the way we live, work, and travel.

HOW DOES IT HELP ASEAN MEMBER STATES?

The Framework identifies 7 workstreams as “Drivers of Productivity”

-  INFRASTRUCTURE PLANNING
-  STREAMLINED PROJECT IMPLEMENTATION
-  KNOWLEDGE SHARING
-  ENHANCING MARKET CAPABILITIES
-  PUBLIC INVESTMENT MANAGEMENT
-  ENHANCING PRODUCTIVITY OF EXISTING ASSETS
-  POST IMPLEMENTATION REVIEWS

TWO TOOLKITS DEVELOPED TO SUPPORT THE IMPLEMENTATION OF THE FRAMEWORK

Toolkit 1: Prioritisation Toolkit

Assist AMS to:

- Self-assess performance across each workstream
- Prioritise workstreams and priority actions
- Identify relevant capacity building needs at a national level

Toolkit 2: Action Plan Toolkit

Assist AMS to customise individual action plans for implementation

BENEFIT AT A GLANCE: IMPROVED INFRASTRUCTURE

GOVERNMENT

Increased savings and economic growth

BUSINESS

Reduced trade and transport cost

CITIZENS

Better infrastructure and quality of life
