

Seamlessly and Comprehensively Connected ASEAN

Enhancing ASEAN Connectivity would benefit all ASEAN Member States by improving physical, institutional and people-to-people linkages, and strengthening resilience across all three Community pillars.

The Master Plan on ASEAN Connectivity (MPAC) 2025 is unlocking more opportunities to create stronger network of peoples, infrastructure and cities that will improve the way we live, work and travel.

Five Strategic Areas of MPAC 2025

Sustainable Infrastructure

Enhance the region’s infrastructure investment and productivity as well as achieve sustainable urbanisation development goals.

Digital Innovation

Connect ASEAN with the digital world of opportunities through adoption of digital technology and standards, enhancing digital financial inclusion, open data and digital data management.

Seamless Logistics

Create a more competitive and seamless ASEAN by strengthening the region’s supply chain ecosystem.

Regulatory Excellence

Implement good regulatory practice for a more integrated ASEAN.

People Mobility

Bring opportunities closer to the people through enhancing intra-ASEAN mobility and human capital.

Linkages and Synergies* Among Strategic Areas of MPAC 2025

Sustainable Infrastructure supports:

Digital Innovation

Development of ICT-related infrastructure

Seamless Logistics

Development of infrastructure to support logistics

People Mobility

Development of aviation, road, rail, and maritime links

Digital Innovation supports:

Sustainable Infrastructure

Understanding of infrastructure productivity through open data

Seamless logistics

ICT solutions for logistics growth (e.g. Internet of Things)

People Mobility

Growth of new digital education solution through open data

People Mobility supports:

Sustainable Infrastructure

Relevant skills (e.g. architecture) to enhance resources to develop infrastructure

Digital Innovation

Relevant digital skills to enhance technological adoption

MPAC 2025 Linkages

Seamless Logistics supports:

Sustainable Infrastructure

Development of infrastructure via the prioritisation of trade routes

Digital Innovation

Boost e-commerce

Regulatory Excellence supports:

Digital Innovation

Adoption of technology by harmonising standards

Seamless Logistics

More seamless flow of goods by addressing non-tariff barriers and harmonising standards
