

Does Building A Smart City Mean Leaving Our Heritage?

Of course not!

**Advancing the historical city
does not mean demolishing
the traditional landmarks!**

**Because preservation and
assimilation of history is
possible with technology!**

LET'S TAKE A LOOK AT AN EXAMPLE

Mandalay

A 160-year-old historic royal capital of Myanmar received the **Smart City Award in 2019** with its:

Installed sensors to monitor real-time traffic through automated control centres.

Radio-frequency identification (RFID)-based system in a new electronic toll payment system.

Garbage trucks with GPS tracking devices that monitor routes and alert control centres of deviations.

But success wasn't built in a day!

Mandalay has drawn up a 30-year urban development plan using smart technology to improve its:

Water Supply

Waste Water Management

Solid Waste Management Systems

Utilising appropriate technology
will support ASEAN cities in
**enhancing their sustainable
urbanisation and improving
the quality of life of their people.**

The Master Plan on ASEAN Connectivity (MPAC) 2025 unlocks more opportunities!

By supporting the advancement
of smart and sustainable cities
in ASEAN.
