

Which One Would You Choose?

IT'S OBVIOUS RIGHT? >

But before you choose, did you know that
we could turn waste water to clean water?

**With sustainable water treatment
inventions, like Vigormin's powder,
you can have safer and
cleaner water!**

**Improving sanitation,
health, and life!**

LIKE THIS

Clean water is the foundation of sustainable urbanisation.

From the Philippines to other ASEAN Member States, **low-cost sustainable solutions are here to **treat and clean wastewater** in our region. Broadening access to clean water for every household.**

These efforts could improve the sustainability of the cities through:

Cleaning rivers, lakes, and ecosystem

Reducing health risks from disease-causing germs & pollutants

Improving water resources & conservation

So what other invention could **contribute to waste management and building sustainable urbanisation?**

COMMENT BELOW!

The Master Plan on ASEAN Connectivity (MPAC) 2025 unlocks more opportunities!

By supporting sustainable urbanisation through the **ASEAN Sustainable Urbanisation Strategy (ASUS)** promotes better waste management.
